Kulim Agrotech centre will help develop R&D

Last update: 03/02/2019

KOTA TINGGI, Feb 3 (Bernama) -- The opening of the RM20 million Kulim Agrotech Research and Development (R & D) Complex will indirectly help the company in the field of research and development, says JCorp president & chief executive Datuk Kamaruzzaman Abu Kassim.

He said Kulim Agrotech Centre, sprawled over 2.87 hectares, was in line with the Johor's government's aspiration to cultivate science and technology and create new value in R & D.

"Kulim Agrotech Centre consists of five operating divisions namely seedling cultivation, tissue culture, chemical laboratory, genomics and microbiology, as well as, agronomic administration and advisory services.
